

BUSINESS EMAIL IMPLEMENTATION PLAN

Proaxis Solutions (Pty) Ltd

Version: 1.0
Date: June 2026
Priority: HIGH — Required to upgrade from Gmail to professional business email
Domain: proaxissolutions.co.za
Registrar / DNS: Woza Domains / TrueHost

⚠ **AI-GENERATED DOCUMENT** — This plan was prepared with AI assistance. DNS and email configuration steps must be verified against the current TrueHost / Woza Domains control panel interface, which may differ from general descriptions below. [VERIFY each step against the actual control panel before executing.]

OBJECTIVE

Configure professional email addresses on the proaxissolutions.co.za domain that forward all incoming email to the current Gmail address (willsonjohnny430@gmail.com) as an interim solution. This allows the company to present professional contact details in all compliance documents, tender submissions, and client communications — without the cost of Google Workspace or Microsoft 365 at this stage.

EMAIL ADDRESSES TO CREATE

Email Address	Purpose
info@proaxissolutions.co.za	Primary business contact — general enquiries and client communication
privacy@proaxissolutions.co.za	Information Officer and POPIA/PAIA correspondence
tenders@proaxissolutions.co.za	Government and corporate procurement correspondence

All three addresses will forward to: willsonjohnny430@gmail.com (interim)

IMPLEMENTATION OPTIONS

Option A — Cloudflare Email Routing (Recommended — Free)

Cloudflare offers free email routing, which creates forwarding-only email addresses on your domain. No email is stored by Cloudflare — it simply routes incoming mail to the Gmail address.

Suitability: Ideal for startup phase. Free. Professional email addresses. No storage. Replies must be sent from Gmail with a “Send As” alias configured.

Requirement: DNS must be managed by Cloudflare (or DNS records must be accessible to add Cloudflare MX records). If the domain DNS is currently managed via TrueHost, you can either add the required MX records manually or move DNS management to Cloudflare’s free plan.

Steps: 1. Create a free Cloudflare account at www.cloudflare.com. 2. Add the domain proxissolutions.co.za to Cloudflare. 3. Follow Cloudflare’s instructions to update the nameservers at TrueHost/Woza Domains to Cloudflare’s nameservers. [VERIFY: TrueHost nameserver update process in the registrar control panel.] 4. In Cloudflare dashboard: navigate to **Email > Email Routing**. 5. Enable Email Routing for the domain. 6. Create three forwarding rules: - info@proxissolutions.co.za → willsonjohnny430@gmail.com - privacy@proxissolutions.co.za → willsonjohnny430@gmail.com - tenders@proxissolutions.co.za → willsonjohnny430@gmail.com 7. Cloudflare will add the required MX and SPF records automatically. 8. Verify by sending a test email to each address.

Option B — TrueHost / Woza Domains Email Forwarding (If Available)

Many domain registrars offer basic email forwarding as a free or low-cost feature in the domain management control panel.

Steps: 1. Log into the Woza Domains / TrueHost control panel. 2. Navigate to **Email Management** or **Email Forwarding** for proxissolutions.co.za. 3. Create forwarding rules for each email address as listed above. 4. Save and test by sending a test email to each address.

[VERIFY: Whether TrueHost/Woza Domains offers free or paid email forwarding for this domain. Check the control panel directly.]

Option C — Zoho Mail Free Plan (Includes Sending Capability)

Zoho Mail offers a free plan for one domain with up to 5 user accounts. Unlike forwarding-only options, Zoho allows you to send emails FROM the business address (not just receive and forward).

Suitability: Slightly more complex setup, but enables the company to send from info@proxissolutions.co.za immediately — more professional than using Gmail “Send As.”

Steps: 1. Go to: www.zoho.com/mail and sign up for the free plan. 2. Add the domain proxissolutions.co.za. 3. Follow Zoho’s DNS verification instructions (add TXT verification record to DNS via TrueHost/Woza Domains or Cloudflare). 4. Create the three email accounts (info, privacy, tenders). 5. Add MX records to DNS as instructed by Zoho. 6. Test by sending and receiving emails.

[VERIFY: current Zoho Mail free plan terms, limitations, and availability at www.zoho.com/mail/zohomail-pricing.html]

EMAIL “SEND AS” CONFIGURATION (FOR FORWARDING-ONLY OPTIONS)

If using Option A or Option B, all replies will be sent from Gmail. To send FROM the business addresses using Gmail:

1. In Gmail, go to **Settings > Accounts and Import > Send mail as**.
2. Click **Add another email address**.
3. Enter “Proaxis Solutions” as the name and info@proxissolutions.co.za as the email address.
4. Gmail will send a verification code to info@proxissolutions.co.za — it will be forwarded to the Gmail inbox.
5. Enter the verification code.
6. Repeat for privacy@ and tenders@ addresses.
7. Set info@proxissolutions.co.za as the default “Send As” address for general correspondence.

Result: Emails sent from Gmail will appear to recipients as coming from info@proxissolutions.co.za. Incoming replies will arrive in the Gmail inbox.

DNS RECORDS REQUIRED

When configuring email forwarding, the following DNS records are typically required [VERIFY with the chosen provider]:

Record Type	Name / Host	Value	Purpose
MX	@ (or proxissolutions.co.za)	As specified by chosen provider	Routes incoming email
TXT	@	v=spf1 [as specified by provider] ~all	SPF record — prevents email spoofing

TXT (optional)	_dmarc	v=DMARC1; p=none; rua=mailto:info@proaxissolutions.co.za	DMARC — additional email authentication
----------------	--------	--	---

DNS access: DNS management is available via Woza Domains / TrueHost. Log in to update DNS records.

POST-SETUP ACTIONS

Once email is configured and tested, update the following immediately:

Document / System	Update Required
PAIA Manual	Replace willsonjohnny430@gmail.com with info@proaxissolutions.co.za (and privacy@ for IO contact)
POPIA Policy	Replace Gmail with privacy@proaxissolutions.co.za
Privacy Notice	Replace Gmail with privacy@proaxissolutions.co.za
Cookie Policy	Replace Gmail with privacy@proaxissolutions.co.za
Terms of Use	Replace Gmail with info@proaxissolutions.co.za
IO Compliance Pack	Update IO contact email to privacy@proaxissolutions.co.za
Company Profile	Update to info@proaxissolutions.co.za
Capability Statement	Update to info@proaxissolutions.co.za
Supplier Onboarding Pack	Update to info@proaxissolutions.co.za
CSD Profile	Update contact email to info@proaxissolutions.co.za
Information Regulator records	Update IO email to privacy@proaxissolutions.co.za
Website contact page	Confirm info@proaxissolutions.co.za is correctly configured
SARS eFiling	Update contact email if needed

IMPLEMENTATION TRACKER

Step

Option chosen (A / B / C)

DNS management access confirmed

Email forwarding configured

Test emails sent and received

Gmail “Send As” configured (if applicable)

All compliance documents updated

CSD profile updated

Information Regulator records updated

FUTURE UPGRADE PATH

When Proaxis Solutions is ready to upgrade to a full business email platform:

Option	Cost	Capability
Google Workspace Starter	~R85/user/month (SA pricing — VERIFY)	Full Gmail, Drive, Calendar, Meet — professional Google ecosystem
Microsoft 365 Business Basic	~R75/user/month (SA pricing — VERIFY)	Outlook, Teams, SharePoint, OneDrive
Zoho One	Paid upgrade from free plan	Full office suite at lower cost than Google/Microsoft

Recommendation: Upgrade to Google Workspace or Microsoft 365 when the company engages its first regular client or when revenue permits — whichever comes first. A professional email platform improves credibility with enterprise and government clients and enables collaboration tools for project delivery.
